

Why Nicheless?

Easy to Install

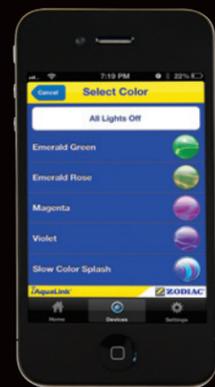

Jandy® Pro Series Nicheless LED Lights require no bonding or traditional niches, making the installation process quick and simple. During construction, simply mount the light directly to the finished 1 1/2" electrical conduit.

Brighter, More Even Lighting

For even lighting with fewer hotspots, use multiple lower power lights instead of one high power light. Since the lights are less expensive, and no niches are required, installing more nicheless lights may even cost less than installing a smaller number of traditional lights.

Easy to Retrofit

Jandy Pro Series Nicheless Lights are the perfect retrofit for fiber optic replacement, especially when a 1 1/2" fitting is already in place. Niche cover adapters are available for the large LED lights allowing them to be installed where niched lights have been previously.

Mobile Control

All Jandy Pro Series lights are AquaLink® compatible. With AquaLink, use iAquaLink™ mobile apps* for anytime, anywhere control using your smartphone or mobile smart device. With iAquaLink select colors and settings from your smartphone using the free iAquaLink apps.
